*Born of our wish to make a lovely small harp, the Odyssey is compact, light - and looks and sounds gorgeous! Innovative in more ways than one, it is the fruit of a collective adventure. Together with our manufacturing partners, we have developed technical solutions for this instrument made entirely in Europe: of very high quality and accessible to all.*

*What else does the Odyssey universe hold? There's a teach-yourself book to get started with your harp, a collection of sheet music for its 27 strings, and the Odyssey Club: a fun and friendly community full of tips and ideas. Come and join us!*

## Odyssey Collection

You'd be amazed what you can play on just 27 strings!

Our Odyssey Collection is full of sheet music, specially arranged for your Odyssey harp. There's something for everyone: the most beautiful classics, traditional tunes from throughout the world, toe-tapping jazz, and new pieces commissioned for the collection!

Odyssey Collection sheet music is clearly divided into three difficulty levels, and there are pieces for harps both with and without levers. What better way to decide what piece you'll master next?
